Public Policy and Comparative Public Policy

MSc Programmes

---

Dr Markus Ketola  
markus.ketola@ed.ac.uk

Agent Conference | 21 May 2024

THE UNIVERSITY  
of EDINBURGH

	Full-time	Part-time
Duration	12 months	24 months
Courses	Six courses over two terms (3, 3)	Six courses over four terms (2, 2, 2, 0)
Dissertation	April to August	Throughout second year

To proceed to the MSc dissertation: average of 50% for the six taught courses

To graduate with an MSc, students have to pass (>50%) dissertation

For CPP students: dissertation **must** include a comparative element

Dissertation *preparation* takes place in late S1 & early S2

Dissertation *implementation* takes place late S2 & through Spring / Summer

Programme Structure

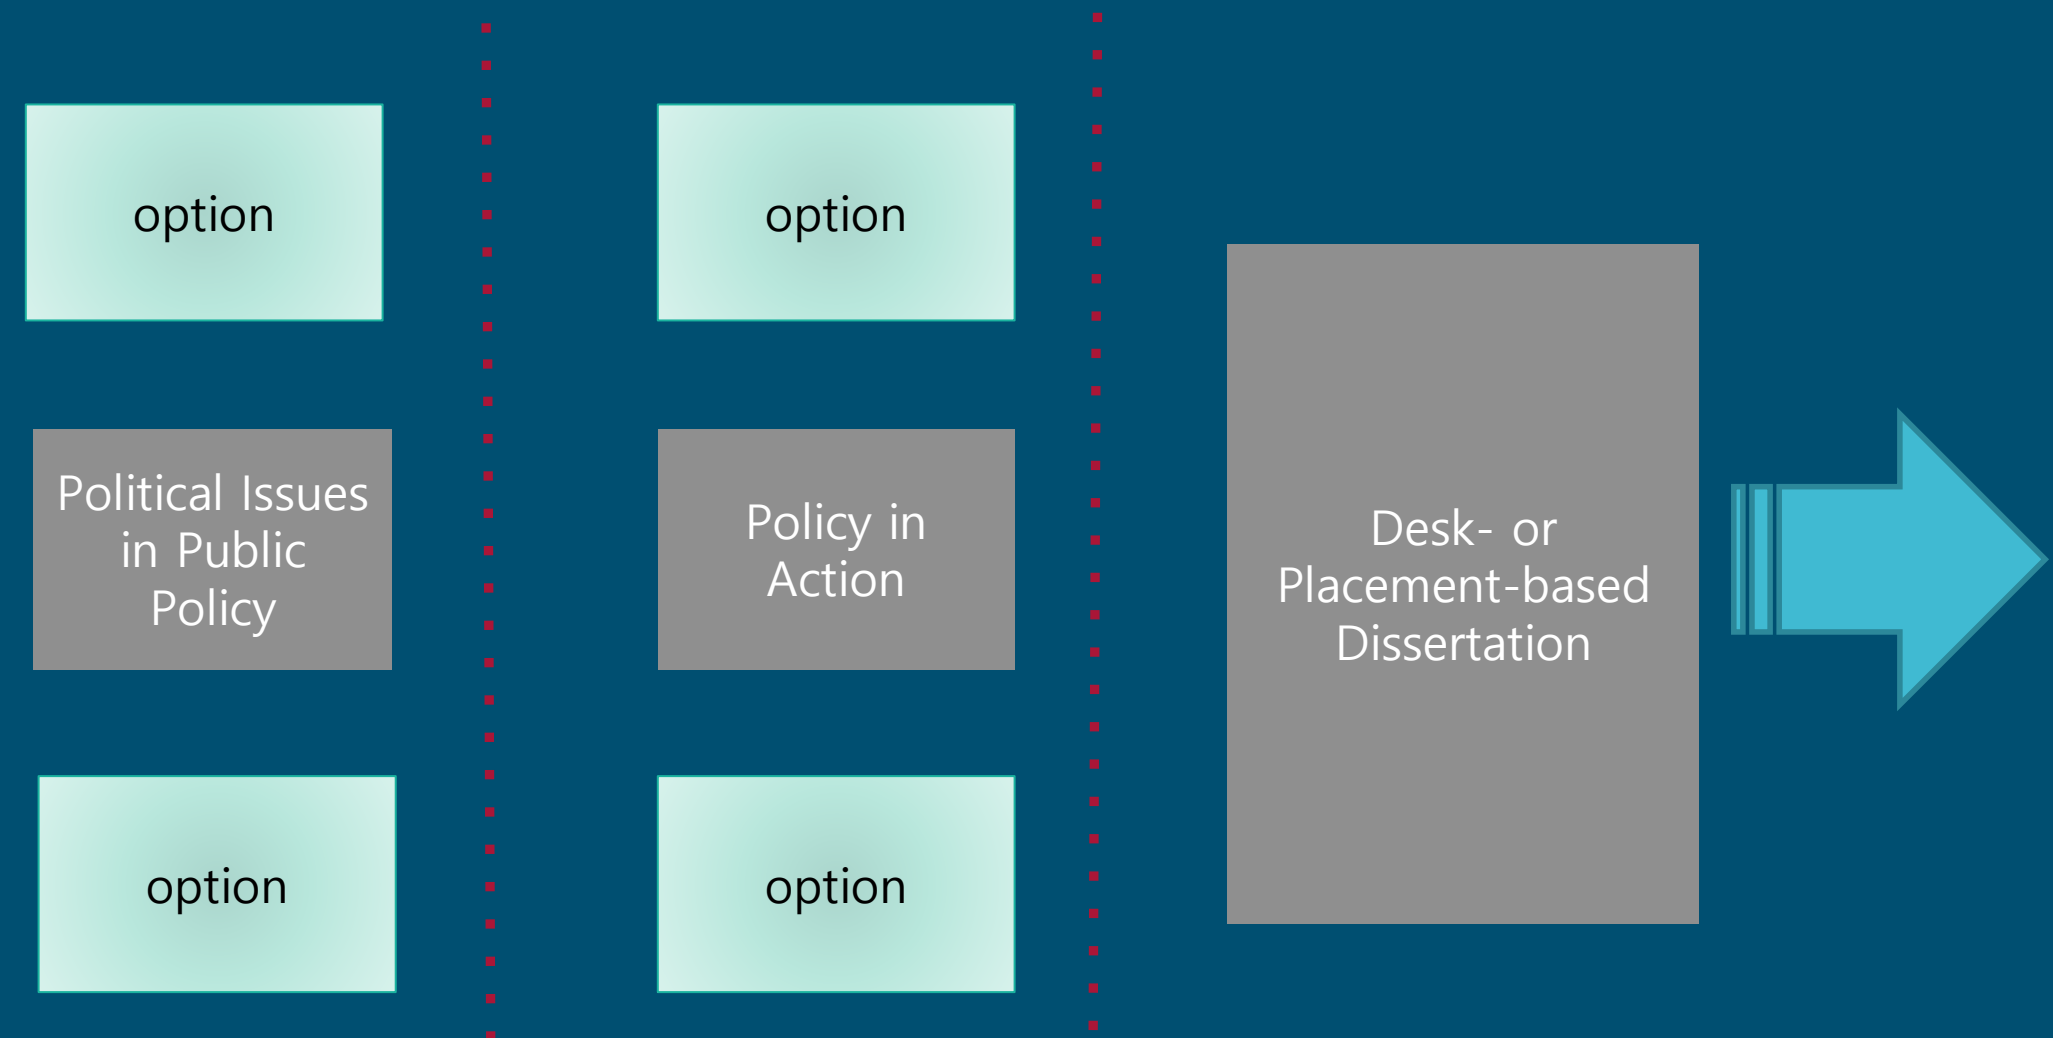

### Compulsory core courses

- Political Issues in Public Policy (S1)
- Policy in Action (S2)
- Dissertation

### Two out of four 'semi-core' options e.g.

Pick for option courses: broadly speaking, courses will be orientated towards:

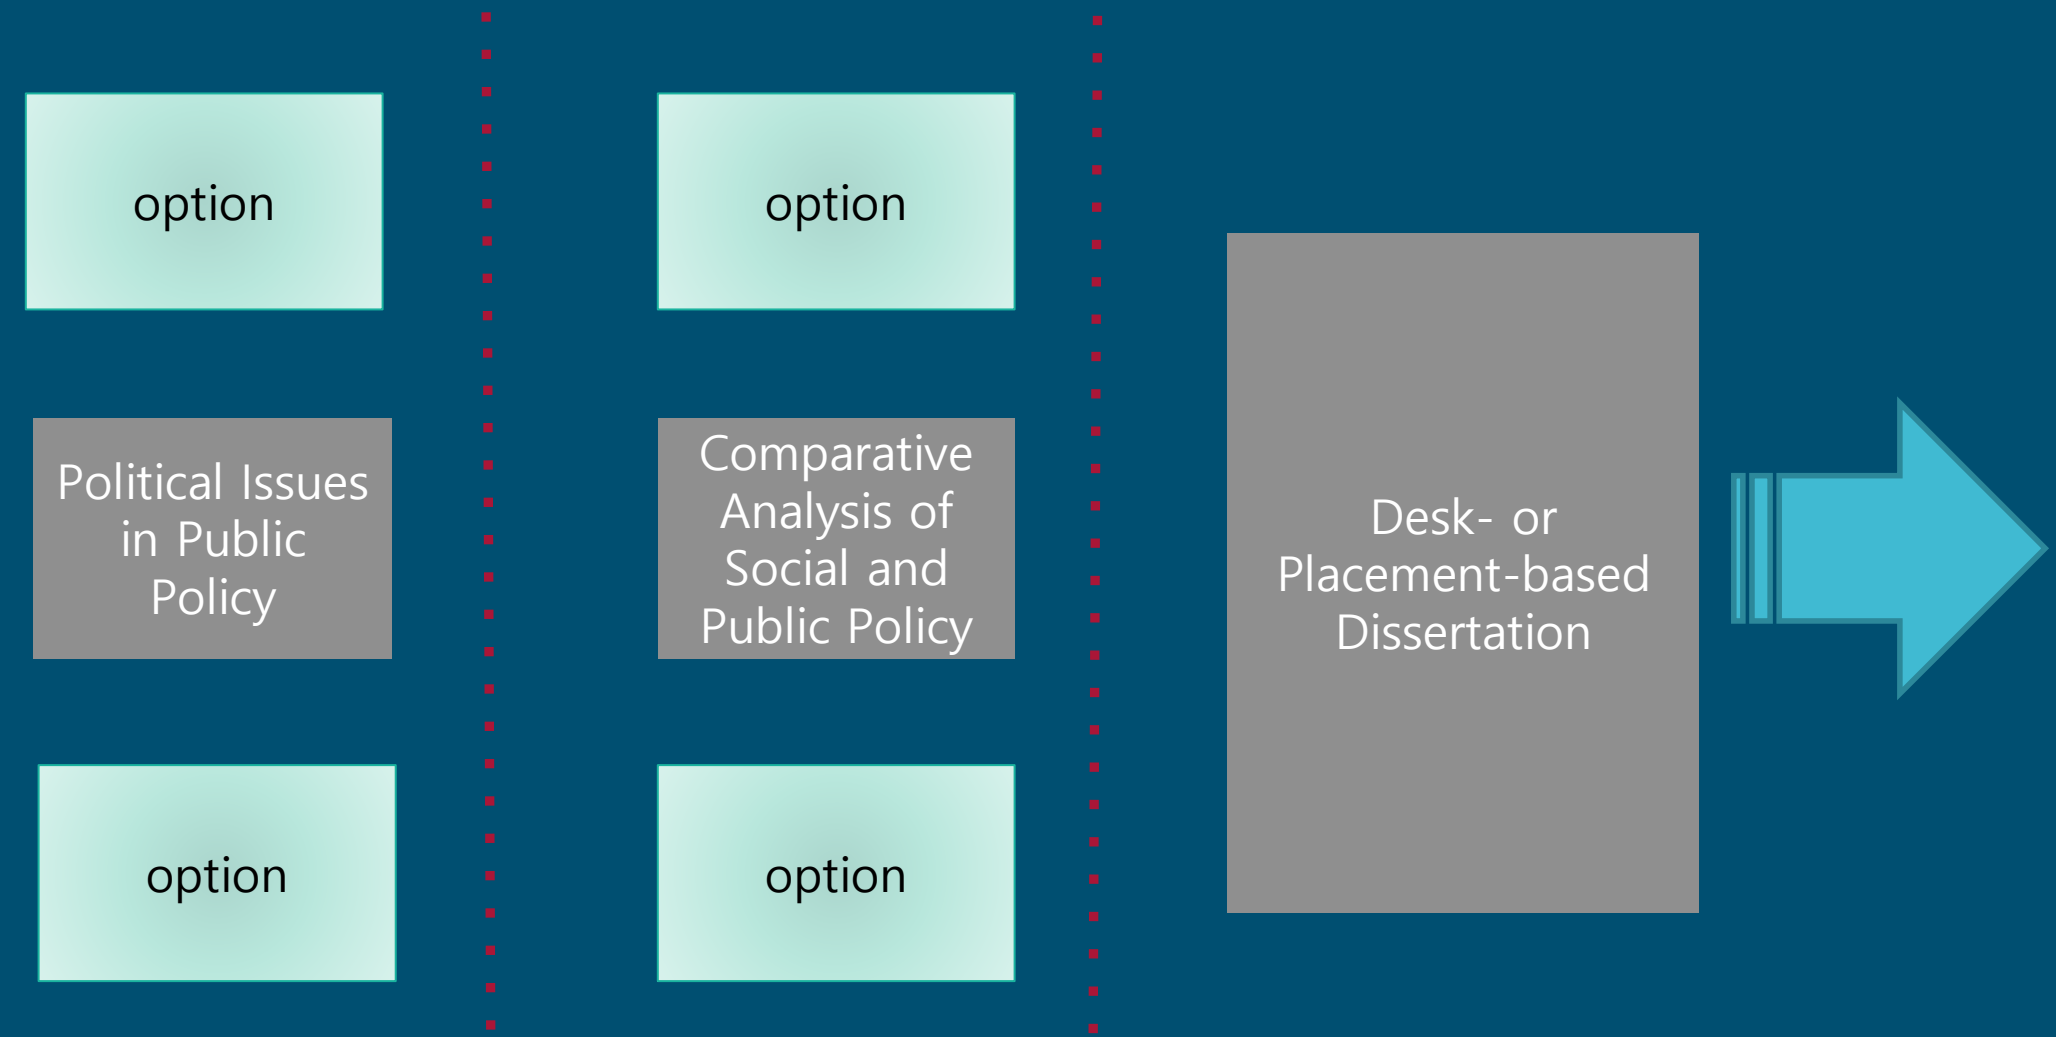

- A method
- A substantive policy field
- A theoretical perspective

- Compulsory core courses
  - Political Issues in Public Policy (S1)
  - Comparative Analysis of Social and Public Policy (S2)
  - Dissertation
- Two out of four 'semi-core' options e.g.
  - European Social Policy (S1)
  - Labour Market Policy: International and Comparative Perspectives (S1)
  - Global and International Social Policy (S2)
  - Global Politics of Public Health (S2)

Comparative Public Policy at a glance: overall structure

**Aims:**

1. Introduce literature on theories and concepts of policy-making process.
2. Provide framework for analysis of political systems and contemporary policy-making.
3. Enable critical reflection on general models of policy-making process and relations between the levels of government and other actors.

Week	Topic
1	Understanding the public policy process
2	Party politics and public policy
3	Organised interests, power and public policy
4	The role of ideas in public policy
5	Institutions, policy change and continuity
6	<b>Narrative policy analysis</b>
7	Governance
8	Policy transfer and translation
9	Evidence based policy making
10	Understanding policy success and policy failure

## Narratives:

- A tool through which humans make sense of their social world (Bruner, 1991)
- A way to create meaning that makes sense of events in their particular social environments (Somers, 1994)
- Make sense of the complexity of human life and social events: ‘sense-making devices’

‘A good narrative not only conveys meaning but offers the listener a way of seeing and thinking about events that points to implications requiring further attention or consideration’ (Fischer, 2003:163)

- Linguistic patterns that do more than merely depict reality; they suggest what reality *ought to be*

THE UNIVERSITY  
*of* EDINBURGH

- Storytelling is how we make sense of what we mean by 'self', 'other', 'society'
- Storytelling allows communities to represent and reflect upon events
- The 'rights' to formulate official stories are not equally distributed, and the meaning of experiences and events is defined by some more than others. (Ochs, 1998)
- Stories are not neutral. It matters who the storyteller is.

Politics of storytelling

- Narratives show a change of state: ‘transition from one state of affairs to another’ (Ochs, 1998: 189)
- Focus on a ‘key event that disrupts the equilibrium of ordinary, expected circumstances’ (1998: 197) and a plotline that transitions back to a new equilibrium.

- Narratives need ‘tellability’: if the link between narratives and peoples’ everyday lives becomes too tenuous, narratives might lose their appeal (Koschorke and Golb, 2018)

What does a policy narrative look like?

THE UNIVERSITY  
*of* EDINBURGH

- Greta Thunberg and Donald Trump as populist storytellers
    - Same story (climate crisis)
    - Different narratives
  - Yet: both apply the same ‘populist narrative logic’:
    - The elites are corrupt and not protecting the interests of the ‘people’
    - Simple, black-and-white narratives about complex policy problems.
    - Not about ideology, but affect; populist narratives are emotional and affective approaches to complex issues
    - Truth-tellers exposing lies of the elite
- (Nordensvard and Ketola, 2022)

Applying narrative analysis: environmental narratives

	Greta Thunberg	Donald Trump
Characters	<p><b>Villains:</b> Corporate Elite Politicians and media The adults</p> <p><b>Victims:</b> The youth, future generations, ecosystems</p>	<p><b>Villains:</b> China Liberal media/fake news The UN</p> <p><b>Victims:</b> US industry &amp; workers, American people</p>
EQ(A): What is the first equilibrium of the story?	<p>The global elites ignore the facts that climate change is creating a disaster that will sacrifice future generations, betting instead on future technologies to enable adult populations to keep on living unsustainable lives.</p>	<p>An imagined past when America was great, and the country could exploit fossil resources without concern for environmental protection and climate change.</p>

	Greta Thunberg	Donald Trump
Change: What disrupts EQ(A) and creates change?	<p>The <i>negative plotline</i>. Business as usual leads to a disaster that ruptures the future of the youth, coming generations, and ecosystems.</p> <p>The <i>positive plotline</i>. Aggressive reduction of global carbon emissions to keep below key thresholds.</p>	<p>Liberals and activists at home/abroad all use climate change as a way to cripple the American economy and give others a competitive advantage.</p>
EQ(B) What is the next/last equilibrium of the plot?	<p><i>Negative</i>: We will reach a tipping point that will lead to changes that will be beyond human control and irreversible.</p> <p><i>Positive</i>: People will rise up against the elite and challenge business as usual. The power lies with the people.</p>	<p>Removal of all climate change regulation that burdens the American economy. Rolling back environmental regulations and withdrawing from 'poisonous' international agreements.</p>
